## Set up an Outlook group

If you're running Outlook as part of an eligible Office 365 subscription, you can use **Groups** instead of distribution lists to more effectively communicate and collaborate with members of a team or an organization.

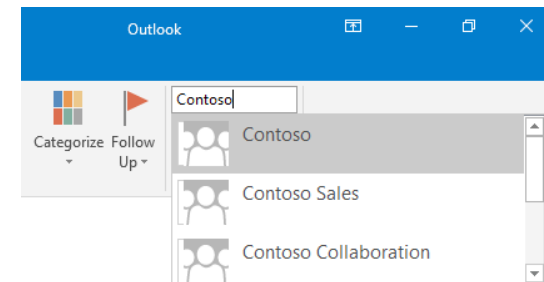

To create a new group in Outlook 2016, click the **Home** tab, and then click **New Items > Group**.

If you don't see this as an option on this menu, contact the administrator of your Microsoft Office 365 subscription for more information.

From the Inbox of any of your Groups, you and the other members can start or join a conversation, create or confirm team events, see a list of members, and get notifications about interactions on any of your shared posts.

To join an existing group, start by searching for its name. On the **Home** tab of the Outlook application window, enter a keyword or phrase into the **Search People** box, and then click to select the group you want to join.
